"Idefy"

Call it a lie
Call it a crutch
Call it denial
Say it's an escape It's only the fear sought
to beguile
Say I've lost my tear
Say I've lost my self doubt
Say I've lost my life
Say I've copped out.
I defy you
Soul is reality
Regardless of what your beliefs may be

Experiments? Proof?
But are you brave enough to enter the laboratory?
Transcendence perceived but will you open your eyes?
A searcher, but are you willing to find?
Or just remain content
Wrapped tight in popular lies

Say no one can know
