Here we are again, standing alone on the brink of emptiness / Prepare for one more goodbye, as the stars begin to dot the sky...

Will you become that stranger alone? / The stars and stripes that mock you flying high above your home... / What will it be like the next time I see you? / Will you ever change your self centered world view?

Where are we going? / And I don't know where we will stay / A handshake and smile, and no kiss goodbye / And we'll each be on our way

Please look after everything while I'm gone / When I'm not back tomorrow carry on / The juggernaut of time works itself in tricky ways / The dancing lessons of bokonon define the path we take...

Why have we come here? / Has our mission been accomplished yet? / A formal goodbye, with no questions why / As we continue on our quest Somewhere in the distance, the future tells our tale / The ships that we have built ourselves have already set sail / Someday things might make sense, its not just bullshit / An answer, a reason... someday we'll find it! / Stories have passed, I'll keep ours in mind / Lost in the fray however frozen in time / I looked into the future & made sense of what we were / I understand the past, my presence is just a blur... Horizons of our destinations
