

1080 "Paradigm"

Hopes of desperation / No more dreams of unity / But
who needs self expression when we've got MTV? /
System designed to break us / As we slave our lives
away / Working for the thrill of fucking minimum wage
pay Fulfill the modern paradigm / Rebellion running out
of time / No one to blame and that's just it / A world
built by a hypocrite

Unachieved goals / In former broken paradigms / This
dream of liberation / Has almost passed its prime / A
future laid out for us / But it isn't set in stone / We don't
have to follow the failed footsteps we've been shown
