Diving in head first  
is what you make me wanna do  
Counting down the hours and minutes with you  
When all is said and done  
cause I want more and I need you  
Phone was ringing, the phone is ringing  
but now it's not (now it's not)

(Chorus)

I could never take (you in the place)  
to take or ever face (wait wait I need you I need you)  
you and I can't replace (Things will work out)2x  
and you could never fake (These feelings feelings)  
Things will work out (they will they will)  
Things will work out (look in my eyes)  
Once we can't run we will hide  
Another dream last night  
where we drove out to a beach  
dive right in  
and made-out under the stars  
why can't you see  
that bridges fall for me  
and the scars on my back (remind me)  
Sleepy eyes, look at me  
sleepy eyes, c'mon  
look at me  
Sleepy Eyes, look at me  
You will see  
Love inside of me until I die  
fill up my sleepy eyes
