I watch and I laugh as you dance
around this French record store as people try to ignore
you
and god gave me a chance to make morning toast
for the girl hogging the listening post
cos I need her and god only knows how I need her

I need desperately to catch up on some sleep
On some sleep

We shouldn't be up this late,
I have work early Monday morning
I'll lift my head of the desk in the ??
and I'll look into the eyes of an over sixty five
And I'll miss you, there's a ?? and ??? issue

I need desperately to catch up on some sleep
On some sleep
I need desperately to catch up on some sleep
On some sleep

She said the situation's been misconstrued
We're not making love, we're making do
We're making do

She said the situation's been misconstrued
We're not making love, we're making do
We're making do
We're making do
We're making do
We're making do
