Watching you sleeping at night so peacefully there in  
your bed  
I'm wondering what are the dreams and schemes  
Going on inside your head  
Do you float on the clouds with the moon for your light  
Or ride on the back of an eagle in flight  
Sleep on let your dreams take you high in the sky  
Let the world pass you by tonight

Dream on little dreamer dream while you can  
One day you'll wake up and you'll be a man  
You're still just a child your spirit is free  
Dream on, dream on for me

Tomorrow awaits and once more you'll wake to the new  
morning light  
You'll have forgotten the places you've been  
The world that you've seen in the night  
Try to remember try not to forget  
The real world is hard and you're not ready yet  
Dream on while you're dreaming I'll always be near  
There's nothing to fear tonight
