### "Stars in the Sky"

Visit "[Stars in the Sky](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Children see stars in the sky and smile  
And they wonder and wish when one falls  
And sometimes their wishes come true  
And I like a child in the night I'm here waiting  
A new star to fall from the Heavens  
And my only wish is for you

Lovers sail on the ocean of love  
For each one a start up above  
Guiding them safe on their way  
And I, search for that star in the night  
That sometime will shine there so bright  
To bring my love safe home to stay

Each night I dream of only you  
To hear your voice again, to feel your touch  
It breaks my heart each day that we're apart  
Right now I'm missing you so much

Sometimes it feels like you're beside me, once again  
I reach to touch your face, you're there no more  
The pain and the fears  
The heartbreak the tears  
And the silence, after you walked out the door

Children see stars in the sky and smile  
And they wonder and wish when one falls  
And sometimes their wishes come true  
And I like a child in the night I'm here waiting  
A new star to fall from the Heavens  
And my only wish is for you
