Does the look in your eyes have, have a different  
gleam  
yeh you say you feel a new aura now you could dream  
ugh I bet you wish you never doubted, now you believe  
yeh, and what you didn't see baby now you could see  
yeh, you could see  
now exposed to a new world xenon lights piped leather  
and cool girls  
new world less order, no champagne yet i'll just have a  
glass of water  
a little ice in it, more life in it  
wanna celebrate but there really aint no time for that  
progress we too busy moving mountains tryna get the  
fam out of public housing  
now my driveway got a water fountain  
pouncing, yeh these chickens be pouncing  
got they hands out ready for the counting  
there really ain't no limit to the money that's amounting  
hey, I know that can be appealing, enticing but that  
barely is a reason  
for ya'll to act that way, am I plagued with fame  
I don't mind guess it's part of the game  
part of the lane or shoulder  
ain't no stopping on this highway for a folgers  
I'm already up plus I'm doing 500 mph  
man life's great  
can't see a thing when you moving this fast  
I only see lights and a little bit of flash  
back from the past that I thought burned to ashes  
hard times mixed with the passion

Long road ahead, better pack light  
journey gets dark, better pack light  
choices and disobedience configure but not quite  
what more can a man want when desire can fuel life?  
but would you? kill for perfection, black feathers  
hearts noir, natalie portman committed  
used to, dance in the light the right one  
but can you? dance with the devil the black swan  
pursuit of perfect is it worth it only on surface  
but inside your dying I got Aronofsky vision

missing, the Citizen Kane to rosebud  
we listen, to relieve the pain like medicine  
your gifted, so we need the light like edison  
the mission, the reasons the same to conquer  
the monster inside you killin' it when you aim for  
it, feel the pain for this  
damn, I've been here before  
as we hit record  
I see the red lights blinking spend my whole life  
thinking  
that I'd grow quite different  
the things we fear in the most, already happened  
what's life without drive and no passion?  
It all passed by, I was passive  
but they can't set sail without the captain  
same song we all feel alone  
thank god mistakes have me grown  
to escape to believe babylon  
with this rebel feeling revealing the visions that I know  
now i'm born  
no longer torn  
the ultimatum  
call me bourne  
no more fear  
so i sworn  
to my mother, father and sister tellin' them i'm home
