You better watch your step
Out on the moonlight mile
You better show respect
Or you'll be here a while
You better watch your mouth
And who you're talking about
And sometimes it is out
Out on the moonlight mile
And let the train that I'm on
And let the train that I'm on
If you don't want on then get off
It's just who I am

And where the sky is closed
the dreams are broken
And everyone acts like they don't know
When there names been chosen
I was an undertaker
Out on the moonlight mile
I was a sore slinger
Out on the moonlight mile

And let the train that I'm on
And let the train that I'm on
You don't want on then get off
It's just who I am
And what trail you carried on
Is it lost into the dark?
If you don't want on then get off
It's just who I am
Who I am
