Here I'm standing in our empty house
All my memories in a box
Loved my mother loved my dad
Could I bring them back with my last breath

Love my children love my wife
She's the one who keeps me alive

Come, come with me to a better place [x2]

She knows death, he's a friend of hers
Told me he's gentle still I'm not sure

I'm scared
I'm quiet
I'm gone
I'm scared
I'm quiet
I'm gone
I am gone

Come, come with me to a better place [x2]
