Take a look in the mirror.every path and shortcut got you here

Lets see if you remember, remember those eyes?
Those scars. those tears, that ran down your cheeks.
All those smiles you couldn't fake were not close to the ones you couldn't help

All those smiles you faked were not close, enough.
Still my heart beats, still the clocks tick I could never stop this(x2)

Those scars, those eyes, those very tears(x2)

It's an endless disease that will never kill me, but it will make me weak from time to time(x2)

Sure... I can stand up straight and kiss you smile, but I'm holding in
My cough like a child fearful of a shot. but I'm fine you'll see. yeah I'm fine you'll see...
