Breath through your mouth as not to asphyxiate.
Require assistance.
Do you require assistance or would you prefer if I
demonstrated for you.
Inhale - Exhale.
That's all there is to this process.
I was unfortunate enough to see you in my rearview
mirror.
You made a bad thing worse when I tried to make a
worse thing better.
I told you that you would never, ever come and get that
from me.
I have never fought for anything in my whole life.
So what makes you think that I'll go and start with you.
