Let's just assume that you're always right,  
But you still wanna put up a fight, turn your back and  
walk away  
'Cause there's nothing left for me to say.

And all-in-all you're barely getting by, you're never  
satisfied.  
Open your ears and shut your eyes (shut your eyes)

It's hard to move you when you're dead inside, there's  
emptiness in your eyes,  
Can't impress you when you're not alive, and why do  
we even try?

All-in-all you never use your mind and you're following  
them blind,  
Open your eyes and see the light (open and see the  
light)

I've always known it's hard to move the ones that don't  
believe in dreams,  
We try our hardest just to reach you but you still don't  
feel a thing.  
And all of the apathy inside this world, you know it's  
killing me.  
I've always known it's hard to move the ones that don't  
believe in dreams.  
You don't believe in anything.

You don't feel a thing at all, it's hard to move you (2x)
