I'm running away from here
I don't feel safe here anymore
i'm leaving
My walls are crashing down around me
cant help to think i'm obsolete

(save me now)

I need some answers
A meaning, a guideline
some proof that there's a way
a way out

Everything has an ending
Even the sun has it's dark spots

Lets sleep this one out
start it all over again and
begin something new

polish the glory
find the last pieces of hope
connect the dots, cover the scars
VENTILATE!

Everything has an ending
Even the sun has it's dark spots

Everything has an ending
Even the sun has it's dark spots
