

Three Degrees, The "Starlight"

Visit "[Starlight](#)" on MotoLyrics.com

Don't have no time to follow rainbows
There never was a pot of gold
And you brought the magic
With your love and sweet simplicity
It's so easy when you find the key to see

The circles turned and you are with me
You give me strength and faith to be
And the stars aligned and brings us into perfect
harmony
You're a guiding light that shines its light on me

[Chorus]
You're like starlight, you're like moonlight
You're my never-ending breath of mystic light
You're like starlight, you're like moonlight
My guiding star of the night
My guiding star of the night
My guiding star of the night
My guiding star of the night

Light forces never to be challenged
There always be a mystery
Like the sweet vibrations running through my veins
when you kissed me
Justified beneath the powers you can't see

You call me, baby, I will follow
I'll trust in you, believe in me
And the stars aligned and brings us into perfect
harmony
You're the guiding light that shines its light on me

[Chorus]

[Interlude]

[Chorus 2x]
