How did you do it?
'Well,' she said, 'smoke & mirrors...
Anything for love, anything for love'

Low expectations
Breathing down my back
No grudge unworthy of holding
I know that won't be hard, I know that won't be hard

You can't take the city out of a city girl

Well I don't know how we ended up here
Wide eyed & new money with faded beauty queens

Down my the river
I found a little town
Down by the river
Where all the lovers go, where all the lovers go

Making teenage boys feel like a Christmas tree
Ogling eyes, ogling eyes
I know you dread the day when it's any other way
