You know I'll go mad if I come close to you
Your voice brings a chill to my fool soul

Crash all the way into you
Crash and there's no way back love

Lay your head down on my bed
Stay with me until dawn
Nothing wrong by staying close
Turn your body upside down
So your lips hide in a dream
And your eyes catch me slow

Crash all the way into you
Crash and there's no way back love

Waiting gives some devil time
Red lights blink and we're going blind

Crash all the way into you
Crash and there's no way back love
Crash
Crash
