No one dropped of waiting in despair  
Every time I go there's no one there  
So tell me where's the soul, oh! where's the soul  
Submit it's all locked up, so hard to loose control

I started nothing, I wish I didn't x4

Wait on a new, gonna bet on 1 today  
How it's only all of us, if and but's falling dead  
Tell me where's the soul, oh! Where's the soul  
If it's been a whole day it's time to let it go

I started nothing, I wish I didn't x4

Now, often we keep givin' in with what they say  
We're too open when we're only shown 1 way  
And with the offer open opportunity to do  
To make a mighty step no insoles in my shoes

I started nothing I wish I didn't x4

Water's cold, ice is just a face skin deep  
All you know, ice is just a face skin deep  
Water's cold, ice is just a face skin deep  
All you know, ice is just a face skin deep  
Water's cold, ice is just a face skin deep  
All you know, ice is just a face skin deep
