God just send a signal yeah
I know I went in blind
I started something I can't stop
A race that has no finish line

But habits are unchangeable
I never seen one through
I love to know the outcome yea
I love to know the truth

It's alright, were alive, I know were only half way there,
come on baby you can make, baby you can make it
alright, it's gonna be fine, I know were only half way
there, come on baby you can make it, baby you can
make it

Well I tried the meditation but the headaches interject
From the social medication that my friends like to
infect
I know that I'm a struggle yeah, I know that I'm a chore,
we can lay down on the ground here, it wont get lower
than the floor
It's alright, were alive, I know were only half way there,
come on baby you can make, baby you can make it
alright, it's gonna be fine, I know were only half way
there, come on baby you can make it, baby you can
make it

It's alright, were alive, I know were only half way there,
come on baby you can make, baby you can make it
alright, it's gonna be fine, I know were only half way
there, come on baby you can make it, baby you can
make it

Alright, were alive, I know were only half way there,
come on baby you can make, baby you can make it
alright, it's gonna be fine, I know were only half way
there, come on baby you can make it, baby we can
make it just fine
