I wanna get close to you but you never let me in
I've seen you trying to act sexy dancing round and
round

You know how much it hurts me babe
You know how much it hurts me babe
You never really had a doubt about it no, about it

It's sounds stupid I know
Cause I bearly know you
But I can't wait much longer...

Till you knock me off my feet
I wanna feel your body heat
Lay on top of you when you scream my name
It's just you and me one body no shame

So, give in to me...

Just take off your mask and let me
See through you
I'm eager to find what's inside of you

It's sounds stupid I know
Cause I bearly know ya
But I can't wait much longer...

Till you knock me off my feet...

Everything around me is falling into pieces
My hands are searching for you now
Everything around me is falling into pieces
I'm looking for your face in the crowd

Nothing lasts forever,
Someday you'll walk away from me,
And the memories will go on and on and on...
