This time, i honestly mean it
I'd do anything for you
But right now, i'm hoping
That we will both pull through

So when our time is right u'll see
U'll be standing next to me (Say it again, say it again)
So when our time is right u'll see
U'll be standing here with me (Say it again, say it again)

Can you make me feel like i'm the only one out there
The only one out there for you
Make me feel like im the only one out there
The only one out there for you
And we will pull this through

As i wait patiently to arrive
I no that this wants to be
My one last chance to do right

So, when our time is right u'll see
U'll be standing next to me (Say it again, say it again)
When our tie is right u'll see
U'll be standing here with me (Say it again, Say it again)

Can you make me feel like i'm the only one out there
The only one out there for you
Make me feel like im the only one out there
The only one out there for you x4
And we will pull this through
