Come On

This is your life live it live it till you die  
live it till every last person is your enemy  
live it till a revelation of war and lies has worn out  
live it till we have nothing left I live it like there's no  
tomorrow  
and most of all make an effort

(Get up)

I'm writing this message this message to you

(Get up)

To tell you something that I still love you

(Get up)

And once more only once more I will tell a lie

(Get up)

The lie that I stopped loving that I stopped caring

I'm begging you one last try

So Come on come on we don't need a reason

Come on come on this isn't living

Come on come on we don't have all day

Yea come on come on cause this is the parade

This life the one that you live is a bitch to you so go  
ahead

(And fuck it right off)

I still like to try to make you the best goddamn thing  
that has

(happened to me)

And this place where we are is beautiful and pleasant

don't let the world

(destroy it for you)

Lets move faster lets bring this place to life lets live it

like it lasts forever

(please god)

So Come on come on we don't need a reason

Come on come on this isn't living

Come on come on we don't have all day

Yea come on come on cause this is the parade

You couldn't see you wouldn't believe it wasn't me in  
the  
(dark that night)  
I tried I begged and pleased and it came to nothing but  
a  
(perfect tragedy)  
Now all I want is for you to believe me and I will make  
effort  
(I will prove myself)  
Please come on come back and believe me that this will  
be  
(you and me)

So Come on come on we don't need a reason  
Come on come on this isn't living  
Come on come on we don't have all day  
Yea come on come on cause this is the parade

So Come on come on we don't need a reason  
Yea Come on come on cause this isn't fucking living
