verse 1

I was alone before i met my friends
I never thought it could ever end
I see them all hanging out together
And they were like yeah whatever

it took me a while to understand
all i needed was to be myself
and theres no use trying to pretend
if you really want to make some friends

chorus

so we're telling you that we've been there before
and we realize we know the score yeah
its alright we can hang around together
we and me best friends forever
any time that your feeling down
all you need is your friends around
its alright we can hang around together

dont care if your hairs to long
we dont care if your clothes are wrong
we can be friends forever

verus 2

its a drag when you got no friends
you can think it will never end
you see them all hanging out together
and they were like yeah whatever

it wont take long for you to see
everybody is just like you and me
we all feel scared at the start
cuz were born with a human heart

so your telling us we've all been there before
pretty soon you'll know you know the score yeah

chorus

its only natural
that you can get it all confused as we go our own way
its just a waste of time
dont worry you'll be fine
it really doesnt matter today

its alright we can hang around together
any time that your feeling down
all you need is your friends around
its alright we can hang around together

dont care if your hairs to long
we dont care if your clothes are wrong
we can be best friends forever

you can be my friend

its alright we can hang around together
we can be best friend forever

you can be my best friend

anytime your feeling down
all you need is your friends around
its alright we can hang around together

you can be my best friend

don't care if your hairs to long
we dont care if your clothes are wrong
we can be best friends forever
