That's time
You're mine, go on, forget her
It's not right
It seem you haunt three girls down
She seems bright
And walked toward now the harm of
Our time
It seem now both your hands may burn

That you see
That you see other fear came round

And walked down to the life
And down to the back, and she will slide

Immortal
Should have said no to all
Should at least started to stall
Should have said no to all

And I knew the shade of state
And I liked you more that day
And if you all could go away
Then I won't try

And that you see
And that you see other fear came low

And your stone covers all we know
A few plans go due I wasn't told
And right, we've never known
Right, we've never known

That you came to all
And you came to all
And if you all could go away
Then I won't try
And if your fear came round the day
Then I will try
Then you came to all
Then you came to all

And you came to all

The best time to count about now, keep quiet
Now when you run from all you have done
We can't stay
We can't stay if you don't hit the salt

I stole cinnamon
The rise and the fall
I should have said no to all
I should have less said, when they started to call
And I liked you more that day
And I liked you more that day
And I'll want you more that day
And if you all could go away
Then I won't try

Then you came to all
Then you came to all
And if you all could go away
Then I won't try
And if your fear came round the day
Then she won't starve
And you came to all
Then you came to all
Then you came to all

No one can ever know, no one can ever know
No one can ever know, no one can ever know
No one can ever know, no one can ever know

Do you want more from me
Then one day we'll bleed
We'll both need to leave
We'll both have to bleed
