Tonight
In this light
You look like an angel
We'll never be strangers again
Don't play hide and seek
Your love makes me weak
And now I can't tell who I am
For what it's worth I'll say
I love you more each day
But, you don't feel the same about me
(chorus)
The way we are together
It's better than

When we are apart
The way we stay forever
I'll always be by your side
When you looked
You got me hooked
I'll always be staring
I can't stop loving you
Now it's you and me
Two lovers can't you see
So why do we care what they say
I'll love you 'til the end of time
I swear that I will make you mine
And a promise that I make I deliver
(Repeat chorus)
