Sleep blind child and dream of the day
At the end of the night
When sight will come your way

It may be hard to open those big eyes
For you are sunken deep
In sleeping all your life

But one day you'll look at those clouds
Awake, just not knowing how
I ever cried for you
When you had only me too

I donâ€™t know why you do the things you do
How you say you donâ€™t know why
You gotta try to keep your cool

But one day you'll look at that sky
Awake, just not knowing why
You ever cried at all
When you had only me too
