can't you make this thing go faster
I'm trying to save us all from something disastrous
and when I'm safe and out of danger
I'll send a message from my spaceship andromeda

nearing objective
everything's go here

solar, I'll do anything for you (lunar)
lunar, I'll do anything for you (solar)

it's empty in the alpha sector
so cut your engines and stay tuned to my frequency
a static signal interruption
I hope you caught that
'cause there's spikes in my status field

origins unknown
something is strange here

solar, I'll do anything for you (lunar)
lunar, I'll do anything for you (solar)

eleven hours since transmission
maintain positions and keep all channels on receive
another static interruption
I know we caught that
keep in loop signal translator

70 hours and I'm starting to feel
like I'm pi on a calculator
endless and unfamiliar
translation download t-minus 17
hey, is that corona lighting the atmosphere
it's well worth the wait, my god, that's amazing
the download's complete and the galaxy is listening
it says "please take a lot of photo's
sidestep new solar systems"
right now you're not ready
but some day you will be, aaah

nearing objective
everything's go here

solar, I'll do anything for you (lunar)
lunar, I'll do anything for you (solar)
(2x)
