Straight edge fuck
God, you suck
Can't believe you preach to me
Whine and cry
All the time
Tell us how our world should be.

Say your life is bullshit
How bad they all treat you
Well you don't know shit
About what your going through.

Take a step back and look at yourself
You're no better than me or anyone else.
Say your beliefs are the only ways
That are great
Our lives are hell
I guess it's just our fate.
You spread your hate.
This world is going to hell
And it's going there really fast
With your wonderful songs
I'm sure it will help it last
It's a horrible thing
All the angst driven strife
That's rotting up our world today
Why don't we all just get a life?

Take a step forward
And look at yourself
You were never better than me or anyone else.
World is overrun by all the corporate
There is nothing you can do about it
FUCK THIS BULLSHIT!
The sickness (x18)
