Remember when we said we'd never part
No purple tears and break each other's heart
Now I'm the fool for trusting this far
'cause now you are my favorite scar

So tick tock 'bout time for the pain come in
When you said we'd all be friends in the end
I hope you'll find what you need
'cause I won't be those things in your magazine

Oh, oh, oh, you were my star now
Oh, oh, oh, you're my favorite scar

So wake me when it's over
And tell me when the feeling's gone
I always knew that you'd be my favorite scar

Your burn is slow but it burns me to the bones
I'm comatose then I start to walk alone
I hope you find what you need
But can I have my heart back 'cause it's starting to
bleed

(chorus)

I miss the way that you smiled
I hate it when you cried
When we said goodbye

Oh yeah, that's what you are, you are my favorite scar
