Inner city deprivation welfare system erodes away  
Reduction of life's facilities and still you want us to pay

You bleed us fucking dry

Desperation of the people trying to keep above the line  
The more you take the less you give now that ain't  
fucking right

You bleed us fucking dry

The harder you work the less that you get  
What seems the fucking point when you're working up  
a sweat

You bleed us fucking dry

Try to keep us all in line work hard and obey bleed  
us of our life line hard work and low pay
