What have we, what have we done?
What have we?

Snow falls in September
April feels like December
Has hope left here forever?
Open up our narrow minds

Why do we hurt each other?
We all bleed the same color
Can we help one another
Open up our narrow minds
Open up our narrow minds

What have we done, what have we done?
Why do we watch the world that we have wasted?
How long 'til we all erase it?
What have we done, what have we done?
Can't you see? it's time for picking up the pieces
Before the ground just falls beneath us
Open up our narrow minds

We vote for someone to trust
And in the end we pay the price for them
We all need to be unbroken
Open up our narrow minds

Smoke fills the air we're breathing
We'll choke until the end is nearing
Don't we know it isn't clearing?
Open up our narrow minds
Open up our narrow minds

What have we done, what have we done?
Why do we watch the world that we have wasted?
How long 'til we all erase it?
What have we done, what have we done?
Can't you see? it's time for picking up the pieces
Before the ground just falls beneath us

Why are we confused?

The warnings are true
This world is used
And we all need to
Open up our narrow minds

What have we done, what have we done?
What have we?

What have we done, what have we done?
Why do we watch the world that we have wasted?
How long 'til we all erase it?
What have we done, what have we done?
Can't you see it's time for picking up the pieces
Before the ground just falls beneath us

What have we done?
We vote for someone to trust
And in the end we pay the price for them
We all need to be unbroken
Open up our narrow minds

Smoke fills the air we're breathing
We'll choke until the end is nearing
Don't we know it isn't clearing?
Open up our narrow minds
Open up our narrow minds
Open up our narrow minds
Open up our narrow minds
