You say they will get you anyway  
Cause they've got pretty tricks to make you stay  
When all turns out to be unjust  
Then I'll turn back and help you out

But the two of us knew that the urban structure fitted so  
much  
better with the drugs and the sick little goings on so I  
have come just to  
check on your injuries and make believe that you're  
running out of time

But you can't feel it  
Or slightly move it  
Or even touch it  
So better burn down the town hall  
the corn fields  
the tower blocks  
and secret paths  
the main roads  
and skater parks  
the public pools  
and dead end school yards  
The train rides to any club night  
We fall too long just to stay along wishes
