Blew the dust off a wooden box  
And set it on the piano  
Nasty words came from its mouth  
The bite marks were to follow  
I should have given it away

I never dream x4

Wide awake for much too long  
My eyes glued to the table  
Tried to feign authority  
But sadly wasn't able  
And then it threw me to the floor

I never dream x4

They say I'm late by half a century  
He died in 1943  
I can't just leave  
He smells it when I'm gone  
So I just take it in my sleep

I never dream x5
