### "False Support"

Visit "[False Support](#)" on MotoLyrics.com

Falling into disgrace we keep on falling  
Getting lost in the city of famous tunes  
"We can help you to get a place for rocking"  
Only bullshit they said to make us shine

You think I would believe your lies  
I am not part of the game you're playing  
With phoney mates and false support !

Working hard but nobody seems to notice  
Sleeping isn't allowed inside my studio  
We keep writting and showing them our lyrics  
They enjoyed it but never did again

You think i would believe your lies  
I am not part of the game you playing  
With phoney mates and false support!

I know you like us but you won't come  
I know you wish us to reach the top  
We know you're lying behind that smile  
We wont let you feel you're the band
