

Waiting, The "Easy to See"

Visit "[Easy to See](#)" on MotoLyrics.com

Oh we are easy to see
We're all together Oh we are easy to see
We're all together Looking at You, we're barely
believing
The way that Your face can light up an evening
All together for a glimpse of You
Trying to be still while You're moving through us
Now if You are through, finished saying Your peace
Could You say it again? Because we don't want to leave
We're resting in the hollow of Your hand
And it's so much more than we can stand
Every one of us here Forever to be changed
Together Wearing Your name.
