Show me the dark
I'll put a bullet between the serpent's two black eyes
The broken road can be so long
Leaving me wide eyed and silver tongued

And if we're gonna do this
To get through this
We need to find the water
And once we're through it
To undo it
We need to find the lighthouse

Light beams that toss inside
With movements I can't hide, returning to your eyes
Lightening bursts of foulness that paint the ether red
Then comes a grumbling thunder

And if we're gonna do this
To get through this
We need to find the water
And once we're through it
To undo it
We need to find the lighthouse

In the shadows
There is a flicker
In the silence
There is a wild call,
Just for me
