"Stepdown"

Visit "[Stepdown](#)" on MotoLyrics.com

while you're sitting in your clock tower town of royal
fogness
black water spreads far and wide seen from the sky
sometime soon you're gonna have to shed your
sterling snobness
do you think black shiny birds can relearn to fly

well it's your turn now, it's your turn now
i think it's your turn now to StepDown
(2x)

you lured us to the black fabric box preaching change
of direction
what you have presented to us is 180 degrees

sitting in your columned fortress with a golden erection
how about some changes for the common man if you
please

repeat chorus

a large golden host sits way up high like a crown
on the shepherd who supposedly has control of his
herd
did you know the ones with deaf ears were chosen to
go down
i think 'petty gossip' were the reported holy words

repeat chorus
guitar break
outro fade to end
