What if I told you
There was no place you could run to
To hide from your fears
Where good is bad and bad is good
And all the cries your cry
No one can hear

Is it heaven - is it hell
Life is what you make it only time will tell
Is it heaven - is it hell
Life is what you make it only time...

Need someone to talk to
But there's no one you can turn to
You cry out in despair
Gotta feeling you should be kneeling on your knees
You scream to the air
Lord the pain it takes it's toll
The devil wants to take my soul
Tell me what should I do
The answer that you need to find

Is in the seeds you've sown
It's all up to you

It's your life - it's up to you
Now it's time to choose
Death and destruction is all in your mind
Could hell be the place for the peace you must find
It's your life - it's up to you
Now it's time to choose
Is God your savior - the key to the light
Or is it hell burning the flames so bright
It's your life - it's up to you
Now it's time to choose
Time's running out - not a second to pause
Be strong in your choice
The decision is yours
It's your life - it's up to you
Now it's time to choose
