Every time you find yourself alone
Winter comes to stay
Don't hide the tears 'cos I've been told
Each one of them shows you the way

It's gonna be alright
It's gonna be alright, you'll see

Wish I could take away your pain
And help you when you fall
And be your guide under the rain
It's hard to make it on your own

It's gonna be alright

Don't hide the pain you feel inside
There's a reason to be found
You'll find a way, just give it time to come around
Don't hide the tears, just free your mind
And see the light breathe in the dark
And you'll find that love is back
