Thinking of you yeah,  
I'll think of you all day  
Think of your kiss kiss kiss on my lips,  
I'll remember this always  
Got the goofiest grin,  
Got a big smile on my face  
Hey you, let's get out out out of this place,  
Grab my hand let's go

Say it's young love at it's best and I tell you I'll  
remember  
Breaking you out through your bedroom window  
Sneaking you into my parent's house and staying out  
all night  
And into the morning, into the morning

Breaking you out through your bedroom window  
Sneaking you into my parent's house and staying out  
all night  
And into the morning until the sun comes up and ruins  
it all

Monday mornin's first class, ditch it  
We'll hang out in the parking lot, only the two of us  
We'll make out 'til the stars come out lay and watch  
them  
That one looks just like the one in your eyes  
C'mon grab my hand and let's go

Say it's young love at it's best and I tell you I'll  
remember  
Breaking you out through your bedroom window  
Sneaking you into my parent's house and staying out  
all night  
And into the morning, into the morning

Breaking you out through your bedroom window  
Sneaking you into my parent's house and staying out  
all night  
And into the morning until the sun comes up and ruins  
it all

Drinking peach schnapps and hanging out in our  
underwear  
Going to parties and leaving because there's no one  
there  
Skipping our classes 'cause really  
We don't even care about anything at all  
We'll get tattoos that we swear we'll never hate  
Break the rules and stay out way too late  
Ain't life grand, isn't it great having no care in the  
world

Say it's young love at it's best and I tell you I'll  
remember  
Breaking you out through your bedroom window  
Sneaking you into my parent's house and staying out  
all night  
And into the morning, into the morning

Breaking you out through your bedroom window  
Sneaking you into my parent's house and staying out  
all night  
And into the morning until the sun comes up and ruins  
it all

It was young love at it's best and it's you that I'll  
remember
