I tried the hard way  
,.. hurt  
When you told me today  
It wouldn't work  
Now I am back alone again  
..how long the time  
And you met someone new fooling around  
Silver song the juke box plays  
Is where I start  
Followed by .. that leads to the bar  
I temporary fix from my drink  
While I just listen to the songs that speak to me  
I've .. it's over rescue me and empty bottle  
And if tomorrow morning comes and plays all night  
I'll try again tomorrow night  
Now I found your .. face  
That seems to have changed  
But now I manage every night to stay up late  
While spending all time and money  
But without you drinking and .. with time  
To the songs that make me blue  
I thought is over  
Rescue me an empty bottle you are all that I need  
And if tomorrow morning comes and plays all night  
I'll try again tomorrow night  
And if tomorrow morning comes and plays all night  
I'll try again tomorrow night

Thanks to feel
