"All Ears"

I'm so happy you called
I really needed a break
From all the people I see
All the people I spend time with

Where did my summer go
The week that was canceled
Was my only chance
To get out of this place

So how have you been
I heard about your problem
At the end of this road
A common solution

My favourite thing about you
Please don't get me wrong
How natural it feels
Five Minutes without talking
Five Minutes without talking
