I wanna run
You're not my son
I wanna live
So much to give
I wanna die
But don't know why
I am employed
To fill the void

Don't question life
Or it is gonna question you
Don't run your mouth
You know it's gonna get to you
Don't push me down
You know I wanna stick around
If I had a choice
You know I'd always be that voice

She is a field
Is it for real?
She is a fire
Burning desire
The circumstance
You got no chance
She is a rope
Made just to choke

Don't question life
Or it is gonna question you
Don't run your mouth
You know it's gonna get to you
Don't push me down
You know I wanna stick around
If I had a choice
You know I'd always be that voice

You only get one chance
Don't blow it on romance
You only get one chance
Don't blow it on romance
You only get one chance

Don't blow it on romance
You only get one chance
Don't blow it on romance
Romance
Romance
On romance

So you climb the tree
What do you see?
Is he just like me?
Do you wanna leave?

Don't question life
Or it is gonna question you
Don't run your mouth
You know it's gonna get to you
Don't push me down
You know I wanna stick around
If I had a choice
You know I'd always be that voice
If I had a choice
You know I'd always be that voice
If I had a choice
You know I'd always be that voice
If I had a choice
You know I'd always be that voice
If I had a choice
You know I'd always be that
