Somehow I know we will succeed,  
we want to defy laws of gravity.  
So go on, remind us one more time  
of how high this wall we've started to climb.

For all of you who ever doubted,  
it's for you, it's for you.  
For all of you who said we'd go far,  
it's for you, it's for you.

We will sign our names in blood.  
We want to believe that dreams come true.  
These dreams pursued dreams please come true.

In many years when we look back,  
we want to believe that we gave it our all.  
We would rather fail trying,  
than wonder if we could have made it.

For all of you who ever doubted,  
it's for you, it's for you.  
For all of you who said we'd go far,  
it's for you, it's for you.

Set the Sun.

The ocean full of your bodies, it feeds us energy.  
We need to do this for us, we need this for you too.  
We will sign our names in blood.  
We want to believe that dreams come true.  
These dreams pursued come true.  
Set the Sun!
