### "Waiting On The Winter"

Take a moment and paint a picture inside.  
This scenery you see is real and it's all around you.  
Instead of saying how amazing we dread the cold.  
See creatures around the corner.

Our days will change like changes in the seasons,  
one day your standing brave the next you're barely  
breathing.  
Our days will change, no waiting on the winter,  
with all these words we say we pass our time away.

All the dwelling on what's next in line we  
suddenly end up at the end of the agenda.  
Appreciation leads to satisfaction.  
Tell a story of why life will pass us by.

With sand between our toes we hope summer never  
goes.  
No waiting on the winter.
