Come around

Whenever you're lonely

Come around

From out of the blue

You know things change they often do

But I always thought I'd be close to you

Come around

From out of nowhere

Come around

Whenever you can

When the rain's so loud that you just can't sleep

I will be the secret that you can't keep

Come around again and again

Whatever you need me for

I'm all I ever was and even more

No matter what came before

I'll always leave an open door for you

You come around

Whenever you're bleeding

You come around

When you want a cure

When the night's so dark that you cannot see
Somehow you find your way back to me
Come around when nothing is sure
You're a million miles from me
I've been a million miles from you
Just remember what is true
(Come around, come around here)
(Come around, come around here)
Nothing can come between us
Nothing can shake you from my heart
(Come around, come around here)
No will, no pain, no hate
No memory can fade that easy
Whatever you need me for
I'm all I ever was and even more
No matter what came before
I'll always leave an open door
Whatever you need me for
I'm all I ever was and even more
No matter what came before
I'll always leave an open door
You come around
Whenever you're lonely
Come around
