"Moonshine"

Cold night, warm heart
Your eyes aflame
So hard to fade
When it's home like this

Breathe in, breathe out
Rough times we had
No promises
After all we've said and done

It's all been said and done

What I feel
Love runs through you
I'll be waiting here
What I feel
Love runs through you
I'll be by your side
That's how I feel

Goodbye, moonshine
A good life we have
Before today
I lived someone else's life

There was someone else inside

All we had is all I needed from you
And nothing else is true
Everything I did, I did for you . . . yeah you
