"Are you alone?"  
That's how it started  
Saving half a shot to feel like it's worth it

Amongst the chaos we'll grow  
Like a mushroom outside Tokyo

Giants on the stage  
Ants on the scene  
Buying beauty to feel in-between

English girls with the tourist hearts  
Blurry photos won't finish what we started, we started...

Did it translate the first time?  
Did I translate the first time?  
To you?  
To you?

You're laying by the phone  
We sang together  
I just wanna hear your voice, even if we talk the  
weather

We're not gonna change our minds  
Feelings trapped inside, let's let them fall and die

Did it translate the first time?  
Did I translate the first time?  
[x2]

It's a lonely way to live (It's a lonely world) [x2]  
It's a lonely way to live in lonely world  
It's a lonely way to live...
