Imbecile Anthem

You're the master we are tools
We follow your star we are the ship of fools

How can you ask whether I still love you
you know there will be no answer as we know that I do
Some mistakes one never wants to learn from and he
can't
didn't you listen didn't you care don't you
understand

I've got a song for the fools
for all the imbeciles
You're the master we are tools
We follow your star we are the ship of fools

I didn't fall in love it was love that fell on me
It just happend you just happened hard and suddenly
Some mistakes one never wants to learn from and he
can't
didn't you listen didn't you care don't you
understand

I've got a song for the fools
for all imbeciles
You're the master we are tools
We follow your star we are the ship of fools
