"From The Under"

Visit "[From The Under](#)" on MotoLyrics.com

From beyond the crooked cracks in hell
A cursed sound begins to bubble and swell
Gearbox powers us into the light

Bring forth this sound, break free from this rubble
Enlighten our souls, bring peace to our troubles

Bring peace to our troubles

Troubles

Let the noise ooze violently from the plates of our stone
And seek vengeance upon the earth's industrial drone
And as the venal machine lays siege on your brain
The sound from the underground eases our pain
Pray for the revolt that persists in its fight
And Gearbox will power it into the light

Gearbox powers us into the light

Gearbox

Gearbox powers us into the light
Gearbox powers us into the night

Gearbox [3x]
